

Manual Test Plan

Ran Li

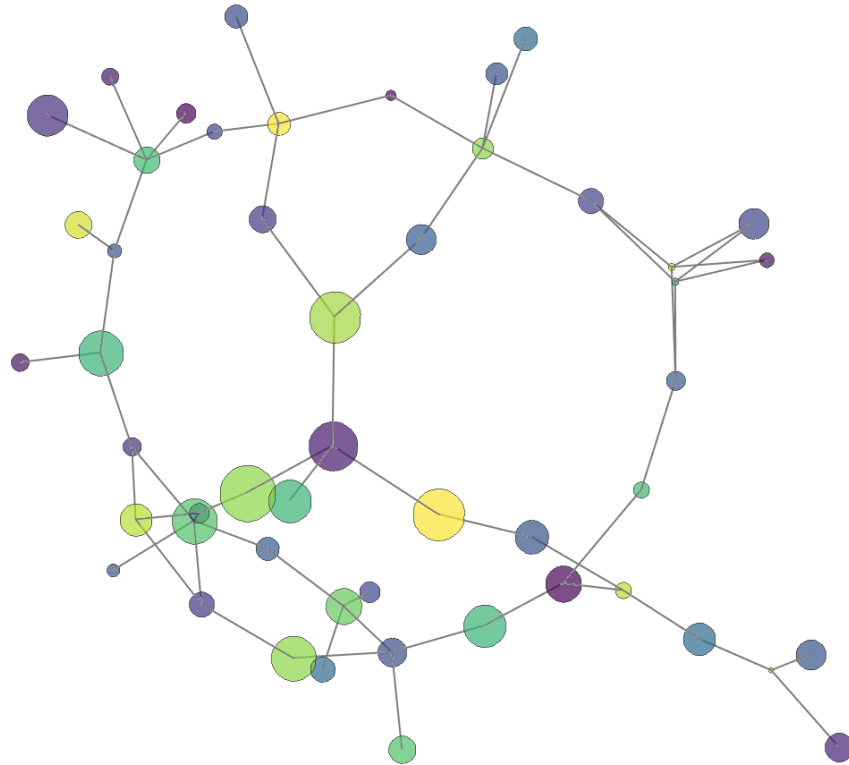

1. Install igraph, plotly and urllib for python3
2. Run python script view/visualization.py
3. The 3d interaction visualization will be in the pop up html:
 - a. The basic GUI looks like:

Network of Actors and Movies Crawler Data
(3D visualization)

Where the darker nodes refer to actors and lighter nodes refer to movies

- b. Drag the screen and change the view angle, scroll down or up to change the scale of visualization

- c. The size of vertices is positive correlated to age (for actor) or grossing values (for movies).
